Drägerware.Workshop Software 5000/7000
Drägerware Software

Simply better organised: With its extraordinary degree of flexibility, Drägerware Workshop software is the ideal complete solution for workshop management. The innovative, user-friendly software solution provides more transparency, improved processes and increased efficiency.

Dräger. Technology for Life ®

Benefits

Everything under control

Save time and costs, gain control and planning security – Drägerware Workshop software makes everyday tasks easier. With this software solution, you can keep an inventory of all of the machines and systems, equipment, units and vehicles that need to be maintained and tested in one central data pool. Services can be optimally planned and easily documented. Testing and control procedures for technical devices can be designed more efficiently.

Advantages that pay off

– Can be adapted to individual organisational structures or processes
– Seamless verification with secure documentation
– Cost savings due to more efficient work
– Strong partnership for a secure investment
– Complete cost control
– Automatic notification of due dates

A variety of options

The management software can be adapted to exactly match your workshop structure. Because it is easy to operate, users can map the technical area and existing processes themselves, without incurring any additional costs for programming. The scalable, hierarchical design allows work-shop areas to be set up, modified and removed individually. In this way, the virtual workshop offers an up-to-date overview with easier orientation, so you can work more efficiently and cost-effectively. It is also easy to integrate interfaces to testing systems into the entire system. With our many years of experience and comprehensive consultation we can provide practical solutions that are geared toward the future.

The following standard workshop modules are available

– Respiratory protection workshop
– Fire extinguisher workshop
– Communication technology
– Tube workshop
– Pump workshop
– Car workshop/vehicle fleet
– Measurement workshop
– Resource workshop
– Inventory management

Extension modules offer additional benefits in special areas.

Benefits

The right solution for every occasion

Our various levels of service packages offer the right solution for every need. An existing standard import interface allows you to quickly import data from other applications.

Drägerware Workshop Software 7000

The ideal solution for adjustment to processes in different workshops:

In comparison with version 5000, this package also offers a variety of important extensions.

– Integrated dialogue editor for adjusting processes on the field level, e.g. showing fields, defining new required fields and modifying field labels
– Fault management module ensures targeted and complete processing of established defects
– Device input and output monitoring offers a constant overview of the devices' locations
– Query generator for easy research at the push of a button
– Integrated document maintenance for easy storage of device related documentation
– Recording and evaluation of all costs related to devices, including cost centre and type

Drägerware Workshop Software 5000

The custom-fit standard solution for individual workshops:

– Includes all standard workshop modules
– Including staff, address and inventory management
– Integrated test equipment coupling of the Dräger Quaestor, Testor, Prestor and RZ 7000 series in the area of the respiratory protection workshop and the Dräger X-dock and E-cal series in the area of the gas detection instrument workshop
– Device management and inventory for all technical equipment
– Preparation, implementation and documentation of maintenance, service and test activities
– Accounting module
– Integrated free report designer for the individual adjustment of existing lists and evaluations
– Data exchange in the CSV industry format

Drägerware.Mobile/Pocket PC

Edit mobile and flexible testing and controlling procedures: together with a pocket PC, Drägerware.Mobile allows easy implementation and documentation of exchange procedures with device recording, safety testing and interval monitoring for the device and much more. You can work directly on devices such as fire extinguishers or equipment on site without a direct connection to the workshop software. The data is updated later using the PC. An easy-to-use user interface in combination with the pocket PC touch screen guarantees a quick, secure working procedure.

Benefits

Changing room module

From accessing the initial equipment and having the right items available to returning used clothing: the changing room module improves distribution and return procedures as well as storage based on requirements. The module was developed in close cooperation with fire departments and includes the complete management of personal equipment, including distribution, return, exchange and loss reporting, and much more.

Extensions offer additional benefits

Our Drägerware Workshop software extensions offer even more benefits to meet certain advanced IT demands.

DRÄGERSERVICE® Consultation and training

In the context of a complete consultation we determine user needs and requirements. Only after we complete this thorough analysis can we create and install the customised software solution. This is the only way we can take all of the customer's needs into account. Even after installation we are always available for personal consultation and dependable on-site service. So that the introduction of the Drägerware Workshop software runs smoothly, we train employees and guide them through the process. So no question is left unanswered and you have more time for new ideas.

Drägerware.Workplace

Work across a variety of sites: even when you're away from the workshop, the data pool and functional range of the Drägerware Workshop software is always available. With a notebook you can access and work with the data required for certain service tasks, for example. After you return, you can update the data by transferring the changes to the data pool.

System requirements

Drägerware Workshop software is easy to install and can be extended as desired.

– Multi-level, network-compatible client/server application
– Microsoft® Windows® Standard (7, 8, 10), executable on standard PCs from Intel® Celeron® 2800 processor, 1024 MB main memory, screen resolution of a minimum of 1280x1024, at least 1 GB free hard disk space
– Supports these database management systems: Firebird, Oracle®, Microsoft® SQL Server

DBMS Interfaces

The lowest possible amount of IT components simplifies the data flow. Especially in the area of database management systems, standards have been established that make homogeneous data management possible. Drägerware supports not only Firebird, a proven open source database that is free, but also the industry standards Oracle® and Microsoft® SQL Server.

Benefits

Features that lighten your load. In your budget and in your everyday work

- Role and authorisation concepts with fine adjustment capability in each workshop module
- Scope of installation and application areas are geared toward the future with infinitely variable scalability
- Customised adjustability to existing organisational structures and processes in the workshops
- Easy integration of interfaces to testing devices from various manufacturers
- Intelligent use of bar code and/or transponder
- Seamless integration of mobile technologies such as wireless scanners, handheld devices, notebooks and Tablet PCs

System Components

D-964-2016

Dräger Quaestor 5000

All static and dynamic tests of the Dräger Quaestor 5000 take place semi-automatically as a sophisticated combination of personal handling and automated control during the test sequence. The newly developed software supports the user with intuitive user guidance.

D-963-2016

Dräger Quaestor 7000

All static and dynamic tests of the Dräger Quaestor 7000 are carried out fully automatically. Controlled by the newly developed software, each test is carried out intuitively. For the user this guarantees high efficiency through comfort and speed.

System Components

D-12657-2014

Dräger Prestor 5000

The Prestor 5000 from Dräger is a highly efficient device that tests the integrity and thus safety of full face respiratory masks. The automatic testing program reduces the time needed to inspect each mask, which makes the testing of even a large number of masks fast and convenient.

D-8496-2016

Dräger Testor 2500/3500

The Dräger Testor 2500/3500 is a compact all-rounder for the static tests of your breathing protection equipment. Testing is reliable, easy, and convenient. The compact design enables both models to be integrated smoothly into any breathing protection workshop.

D-38692-2015

Dräger RZ 7000

Easy to use: With the Dräger RZ 7000 you can carry out the function and leak tests of the Dräger PSS® BG 4 plus easier and faster than ever before.

D-47907-2012

Dräger X-dock® 5300/6300/6600

The Dräger X-dock® series provides you with full control of your portable Dräger gas detection instruments. Automatic bump tests and calibrations with reduced test gas consumption and short testing times save time and money. Comprehensive documentation and evaluations provide you with a clear overview.

Accessories

D-5871-2018

Zebra TC-51 with Drägerware.App

The system solution Zebra TC-51 with Drägerware.App enables simple and convenient management of equipment inventories, particularly for users in the fire services, chemical and oil & gas industries.

Technical Data

PERFORMANCE COMPARISON

DRÄGERWARE WORKSHOP SOFTWARE 5000 VS. 7000	5000	7000
Simultaneous licenses provided	1	1
Modern design and easy-to-understand user interface with clearly arranged work area for pending intervals, inventories and messages	Yes	Yes additional overview of defects
User-defined favourites area with bar code or RFID quick selection function	Yes	Yes
Freely definable workshop structure	Yes	Yes
Dräger test equipment and calibration station coupling*	Yes	Yes
Integration of Dräger Bodyguard PC-Link software with Datalog transfer function	Yes	Yes
Test-based delivery note and invoicing	Yes	Yes
Inventory management tool with stock management and order proposals	Yes	Yes
Fault management	No	Yes
Document management	For FwDV7 usage list	Any type and number of documents
Personal management of personal protective equipment	Yes	Yes
Active notification feature for monitoring pending inspections	No	Yes
Existing reports and statistics adaptable via integrated, free report designer	Yes	Yes
Included address and staff management	Basic	Full
System-wide adjustability of the application dialogues	No	Yes
Controlling module for cost recording and analysis	No	Yes
Free updates and extended support via software service contract	Yes	Yes

This list only includes an excerpt of the feature comparison.
